PROFESSIONAL SUMMARY

Full-Stack Developer specializing in the MERN Stack and Next.js, experienced in building scalable, high-performance, and user-centric web applications from front to back end. Proficient in JavaScript (ES6+) and TypeScript, with strong hands-on experience in React.js, Next.js, Node.js, Express.js, and MongoDB. Skilled in developing responsive, cross-browser compatible interfaces, RESTful APIs, authentication systems, and server-side rendered applications. Experienced in state management (Redux Toolkit, Context API), database design, and integrating AI-powered features using the Google Gemini API. Passionate about writing clean, maintainable code and delivering complete, production-ready solutions. Currently seeking a Full-Stack / MERN Stack Developer role to contribute to impactful projects and continue growing as a developer.

TECHNICAL SKILLS

- Frontend Development:** HTML5, CSS3, JavaScript (ES6+), TypeScript
- Frameworks & Libraries:** React.js, Next.js, Redux Toolkit, Context API
- Styling & UI:** Tailwind CSS, Bootstrap 5, Material UI, Styled Components
- Backend Development:** Node.js, Express.js, RESTful API Development, Authentication & Authorization (JWT)
- Database:** MongoDB, Mongoose, Firebase
- AI Integration:** Google Gemini API
- API & Data Handling:** REST APIs, Fetch API, Axios, Async/Await
- Tools & Platforms:** Git, GitHub, VS Code, Chrome DevTools, Figma, Postman
- Deployment:** Vercel, Netlify, Railway
- Other (Basics):** Docker, CI/CD, AWS

WORK EXPERIENCE

React.js Developer Intern | Internee.pk | April 2026 – June 2026 | Karachi, Pakistan (Remote)

- Worked as a full-stack developer, independently building, deploying, and documenting 6 real-world projects spanning frontend redesign, AI integration, and full-stack CRUD applications
- Built an AI-Powered Resume Analyzer with ATS scoring and Gemini-driven feedback using the Google Gemini API
- Developed a full-stack AI Chatbot with persistent chat history and an integrated credit/payment system
- Developed a full-featured multi-vendor E-Commerce platform with a complete admin dashboard
- Redesigned Internee.pk's company website with a fully responsive, component-based React UI
- Created a searchable, grid-based image gallery integrated with the Unsplash API
- Built a Notes application (inspired by Google Keep) with complete CRUD functionality
- Worked across the MERN stack (React.js, Next.js, Node.js, Express.js, MongoDB) along with REST APIs and AI integration
- Strengthened skills in full-stack development, AI-powered feature integration, and writing production-ready, scalable code

Full-Stack Development (Apprenticeship) | Saylani Mass IT Training (SMIT) | April 2025 – May 2026 | Karachi, Pakistan (Onsite)

- Completed an intensive Full-Stack Development program, building 30+ hands-on projects from scratch covering the complete development lifecycle
- Developed responsive, cross-browser compatible user interfaces using HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), and TypeScript
- Built scalable Single Page Applications (SPA) and server-side rendered applications using React.js and Next.js
- Designed and developed RESTful APIs and backend services using Node.js and Express.js
- Implemented database design, schema modeling, and CRUD operations using MongoDB
- Implemented secure authentication and authorization systems using JWT and Firebase
- Managed version control and team collaboration using Git and GitHub
- Gained hands-on exposure to containerization (Docker), cloud fundamentals (AWS), and CI/CD workflows
- Built a solid, practical foundation across the full development stack — from UI design to backend architecture and deployment

PERSONAL PROJECTS

MaintainIQ — AI-Powered QR Maintenance & Asset History Platform

- Built a full-stack, AI-assisted asset maintenance platform using QR codes, enabling public users to report equipment issues without requiring login
- Integrated Google Gemini API for AI-powered issue triage — automatically classifying complaints by title, category, priority, and probable causes from free-text input
- Designed and enforced a strict backend state machine (Reported → Under Inspection → Under Maintenance → Operational) to prevent invalid status transitions
- Implemented role-based access control (Admin/Technician) with JWT authentication and permission-scoped dashboards
- Developed secure RESTful APIs with Express.js and MongoDB, ensuring public endpoints exposed only safe, filtered data
- Built a complete asset history and audit-log system, tracking every status change and maintenance action per asset
- Designed a full Postman API collection with auto-chaining test scripts for end-to-end endpoint testing
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Google Gemini API

Resume Roaster — AI-Powered Resume Analyzer

- Built a full-stack MERN application that analyzes and scores resumes against ATS (Applicant Tracking System) standards using the Google Gemini API
- Implemented secure PDF upload and text extraction using Multer and pdf-parse, with file-size and format validation
- Designed AI-powered structured parsing pipeline, converting raw resume text into validated JSON using Gemini's structured output and Zod schema validation
- Developed an ATS scoring system (0–100) with detailed breakdowns across keywords, formatting, impact, and clarity
- Built AI-driven feedback features including prioritized issue detection, strength identification, and automated bullet-point rewriting with rationale
- Designed a dashboard with score history, KPI cards, and an insights page tracking user progress over time
- Applied rate limiting on AI requests to prevent abuse and ensure system reliability
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Google Gemini API, Zod, JWT

CarRental — Car Rental Booking System

- Built a full-stack MERN car rental platform with dual-role functionality for renters and car owners
- Developed a booking system with date-based availability selection, booking history, and status management
- Designed an owner dashboard enabling car listing management (add/edit/delete) and booking oversight
- Implemented secure JWT-based authentication and bcrypt password hashing for both user and owner roles
- Integrated ImageKit for efficient, CDN-based image upload and management of car listings
- Designed and developed a RESTful API architecture with role-based route separation (user, owner, bookings)
- Built a modern, responsive UI using React 19, Tailwind CSS 4, and Motion for smooth animations
- Deployed both frontend and backend independently on Vercel with environment-based configuration
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, ImageKit

EDUCATION

Intermediate (Pre-Engineering) | Ziauddin University, Karachi | 2022 – 2024

CERTIFICATES

- HTML, CSS, JavaScript Certificate – Cisco
- Coding Night Participation Certificate – SMIT
 - Completed a high-intensity 12-hour hackathon focused on rapid problem-solving and frontend development.

LANGUAGES

- English (Intermediate)
- Urdu (Native)
